

Cloud Software

ServNet's Cloud Software is the premier solution for accessibility and cost efficiency.

- ✓ Reduce capital expenditures on hardware / software
- ✓ Free up valuable resources and maintenance expenses
- ✓ Superior reliability through our 99.999% uptime guarantee
- ✓ Much safer and more reliable than an in-house IT infrastructure

Hosted Exchange

The world's most popular business email and collaboration platform. Enables you to effortlessly share documents, calendars, contacts and tasks at the office or on your tablet, BlackBerry, iPhone, or Android.

Hosted Lync

Lync is a secure collaboration tool, particularly for keeping employees and multiple offices in sync. Employees can manage instant messaging, voice chat, video chat, meetings and shared whiteboard sessions.

Hosted Sharepoint

With SharePoint you can share documents, calendars, contacts, links, ideas and more, without wasting time exchanging inefficient emails. Securely share them within the company, partners, vendors and customers.

Cloud Software with ServNet

Microsoft Exchange 2013

Increase your business's efficiency with Hosted Microsoft Exchange 2013. Exchange 2013 includes many new features to help your employees boost their productivity by offering a consistent inbox, calendaring, and contacts experience across the PC, browser, and mobile phone. Exchange 2013 offers an enhanced Outlook Web App that can be accessed from Firefox and Safari browsers, in addition to Internet Explorer. Plus enhancements to mobile access allow you to extend the productivity benefits of Exchange to workers even when they're away from their PC.

Microsoft Lync 2013

Microsoft Lync from ServNet offers your business secure instant messaging, presence and unified communications in a hosted solution, giving you all the productivity benefits without the IT management challenges. Lync provides a secure and professional alternative for instant messaging and unified communications. Features include free/busy status integrated with Outlook / Sharepoint, conversations saved inside Outlook, fast PC-to-PC file transfers, and fast video conferencing with VOIP phone integration.

Microsoft SharePoint 2013

Hosted Windows SharePoint is a powerful platform for building shared document repositories, corporate Intranets, and project specific website. There is no hardware or software to manage, and accessible anytime, anywhere through a web browser. Windows SharePoint is designed to increase productivity. Businesses of any size can leverage SharePoint to create document storehouses to increase collaboration within a company and between a company and its partners, vendors and customers. With Windows SharePoint you can share documents, calendars, contacts, links, ideas and more, without wasting time exchanging inefficient emails.
